

STILL A VIABLE OPTION FOR SPRING 2019!

Calyxt™ High Oleic Soybean Oil is designed to address consumer demand for healthier ingredients while providing improved performance and functionality for the food industry. Producers can earn significant identity preserved premiums with Calyxt™ compared to regular soybean varieties.

Supplying Late Spring 2019 Demands:

- Calyxt CAL1501 is a 1.9 maturity bean, which is still a great planting option for this year's late spring
- High oleic has a higher premium over regular soybeans - **up to \$2.00 per bushel!**
- **Calyxt nets \$74 MORE per acre** than regular soybeans even after accounting for higher herbicide costs.
- Returns are comparable to Prevent Plant premiums plus the opportunity to qualify for Market Facilitation Payment (MFP#2) payment

CAL1501

Anticipated Variety Growing Area
1.9 Maturity

- **Agtegra is still contracting acres now for 2019**
- **Harvest delivery options at Agtegra in St. Lawrence and Kennebec, SD***
- **Farm storage options available with buyers call delivery**
- **Agtegra Agronomic Expertise**
